

SharePointKonsult

Your Global SharePoint partner

BACKGROUND

SharePoint out-of-the box has very basic User Interface (UI) elements. Because of the ease of setting up SharePoint, important portal design principles and quality are often overlooked during implementation.

SharePointKonsult now offers a unique range of services to address User Interface (UI) and User Experience (UX) design requirements on the SharePoint platform. Employing world class design principles we create SharePoint portals with exceptional usability and high user adoption.

USER INTERFACE SERVICES (UI)

Our UI Services are aimed at the creation of portal designs that are visually attractive, consistent with your corporate identity and functional. The level of UI design is comprehensive, encompassing all portal components right down to iconology.

The UI services offered are:

- Brand Development
- Portal Brand Conceptualisation
- Information Architecture
- WireFrame Prototyping

a professional services firm that **implements, develops and supports** business software solutions
